## INTRODUCTION

The Guides to German Records Microfilmed at Alexandria, VA, constitute a series of finding aids to the National Archives and Records Administration (NARA) microfilm publications of seized records of German central, regional, and local government agencies and of military commands and units, as well as of the Nazi Party, its component formations, affiliated associations, and supervised organizations. For the most part, these records were created during the period 1920-45.

The guide series was initiated as a microfilming project of the Committee for the Study of War Documents of the American Historical Association (AHA) in cooperation with the National Archives and the Department of the Army. With the termination of AHA participation in July 1963, the National Archives assumed sole responsibility for the reproduction of records and the preparation of guides.

Guide No. 95 is Part III of Records of the Waffen-SS (Armed SS) reproduced on 146 rolls of NARA Microfilm Publication T354 (rolls 654-799) which are part of the National Archives Collection of Seized Enemy Records, Record Group 242. Parts I-II constitute Guides Nos. 75 and 79. Related Miscellaneous SS Records, also included in NARA Microfilm Publication T354, are described in Guide No. 27. Related Records of the Reich Leader SS and Chief of German Police (Reichsführer SS und Chef der deutschen Polizei) are described in Guides 32, 33, 39, and 81.

This guide describes records of the 1st SS Deaths-head Cavalry Regiment (1. SS-Totenkopf Reiterregiment) during its service in Poland from September 1939 through 1943. A small amount of material, chiefly administrative orders, training schedules, and personnel records, pre- and postdate this period. A substantial amount of material concerning the operations of SS cavalry units along the Eastern Front, in the Ukraine, and in Belorussia through late 1943 is also included.

Provenance of the records reflects various unit designations, subdivisions, and reorganizations. As a Nazi Party SS formation it was originally designated SS-Totenkopf Reiterstandarte. After its mobilization for wartime military operations, that term continued to be used interchangeably with the German military terminology SS-Totenkopf Kavallerieregiment as well as the variant SS-Totenkopf Reiterregiment. By orders of the SS-Führungshauptamt, Kommando der Waffen-SS, dated December 6, 1940, the regiment was assembled from elements of the 1. and 2. SS-Totenkopf Reiterregimente, headquartered in Warsaw and Lublin respectively, with 12 company-equivalent squadrons (Schwadronen) located throughout Poland. The resulting 1. SS-Totenkopf Reiterregiment, under the command of SS-Standartenführer Hermann Fegelein, was occasionally referred to as "Gruppe Fegelein." Prior to this reorganization, the 1st SS-Totenkopf Cavalry Regiment had served in rear areas during the invasion of Poland (September-October 1939) and then been assigned occupation duties. The 2d SS-Totenkopf Cavalry Regiment was primarily an occupation force, although it also engaged in antipartisan operations in Poland and in rear areas along the Eastern Front. In April 1941, it was detached from Fegelein's command and reactivated as a separate regiment under the command of SS-Sturmabführer Franz Magill with headquarters in Lublin.

The bulk of records described in this guide concern SS administrative and personnel matters in the areas of Chelm, Cracow, Garvolin, Jablon, Kielce, Krasnystaw, Lodz, Lublin, Lucmierz, Lukow, Radom, Seroczyn, Skarzynsko-Kamienna, Tarnow, Tomaszow, Warsaw, and Zamosc, Poland.

Among the types of records included are daily and special orders issued by the Waffen-SS Military Commander East (Befehlshaber Ost) in Cracow; regimental and brigade-level orders; organizational charts; construction budgets; training directives; reports on operations, supplies, inspections, troop strength, rations, veterinary services, mess facilities, canteens, medical facilities and services, sports events, recreational facilities, billeting of personnel, and gas supplies and motor vehicles with motor pool logs and lists of monthly trips; and inventories of horses, horse fodder and other supplies.

Personnel records reproduced on Rolls 662-666, 674-676, 678, and 707-708 consist of miscellaneous alphabetically arranged personnel rosters for various units attached to the 1st and 2d SS-Totenkopf Cavalry Regiments. Rolls 796-799 include 264 alphabetically arranged personnel files for members of the Armed SS-Cavalry Regiment in Poland (1939-43) consisting of personnel lists; daily duty rosters; payroll lists; records of troop enlistments, replacements, transfers, and discharges; reports on court martials and other disciplinary actions; accident reports and accident and casualty lists; some cemetery records; evaluation reports for students at SS noncommissioned officers school in Lucmierz, Poland; and applications for German citizenship filed by SS personnel recruited in Poland. Other lists contain names of Polish and Jewish employees working for the 1st SS-Totenkopf Cavalry Regiment and ethnic Germans from Hungary who volunteered for SS duty. Other records reproduced are reports on legal cases involving SS personnel and Polish nationals, including mistreatment of Jewish women by SS members, civilian morale, recruitment of ethnic Germans for SS service, and the confiscation of livestock and evacuation of civilians along the Eastern Front.

The original records described here were returned to the Federal Republic of Germany and deposited at the Bundessarchiv-Abteilung Militaerarchiv in Freiburg/Breisgau. The master negatives of Publication T354 have been retained by the National Archives, and copies of specific rolls may be purchased from Publications Distribution (NECD), National Archives and Records Administration, Eighth and Pennsylvania Ave., NW, Room G-9, Washington, DC 20408. For instructions on ordering microfilm, follow the guidelines on page xxiv.

The introduction and item descriptions for Guide 95 were prepared by George Wagner and edited by Amy Schmidt.

## CAPTURED GERMAN AND RELATED RECORDS IN THE NATIONAL ARCHIVES (As of 1995)

The National Archives holds over 30,000 rolls of microfilm reproducing captured German and related records as described below. Reference copies may be consulted without charge at the National Archives at College Park (Archives II) beginning in the spring of 1995. Call 301-713-7230 for further information concerning the exact date of availability and location of the microfilm. For suggestions on citing microfilm, see page xxii of this guide.

A history of the American and Allied, public and private, projects in which these records were created or assembled, exploited, described, and microfilmed is to be found in *Captured German and Related Records, A National Archives Conference*, ed. Robert Wolfe (Athens, Ohio: Ohio University Press, 1974), xix and 279 pp.

For more detailed reference information on subject matter, please write to Archives II Textual Reference Branch (NNR2), National Archives and Records Administration, 8601 Adelphi Rd., College Park, MD 20740-6001, or call 301-713-7230.

### Warning:

The original paper records have been returned to the country of origin. A relatively small number of these papers may have been of private origin; the fact of their seizure is not believed to divest their original owners of any literary property rights in them. Anyone, therefore, who publishes them in whole or in part without permission may be held liable for infringement of property rights.

### **III. NATIONAL ARCHIVES COLLECTION OF WORLD WAR II WAR CRIMES RECORDS, RECORD GROUP 238**

In Europe, the United States conducted war crimes trials under three jurisdictions: that of the International Military Tribunal (IMT) at Nürnberg (RG 238), that of the U.S. military tribunals at Nürnberg (RG 238), and that of the U.S. Army courts (RG 153 and RG 338). The records of the trials at Nürnberg generally consist of transcripts of the proceedings; prosecution and defense exhibits;

interrogation records; document books; and court papers including official court files, minute books, order and judgment books, and clemency petitions. In addition, the Nürnberg trial records include the prosecution document series from which most of the prosecution exhibits and some defense exhibits were drawn. Descriptive pamphlets (DP) and Special Lists are noted for many of the listed microfilm publications.

#### Records of the U.S. Army War Crimes Trials in Europe

War crimes trials records for Germany were also collected or generated by the U.S. 3d and 7th Armies initially, then by special war crimes sections of the Judge Advocate General (JAG), Europe. Because these sections sent reports and other materials to Washington, some of the same material is in RG 153, Records of the Office of the Judge Advocate General (Army), and has proven to be a useful source for filling in gaps discovered in the RG 338 records. While materials from RG 153 are frequently found in the microfilmed publications listed below, in each case the great bulk of the records filmed come from RG 338.

## SUGGESTIONS FOR CITING MICROFILM OF CAPTURED GERMAN AND RELATED RECORDS IN THE NATIONAL ARCHIVES OF THE UNITED STATES

The National Archives and Records Administration (NARA) is frequently asked to provide recommendations regarding information to be included in footnotes and other references to records among its holdings. The following suggestions should serve this purpose and also help our staff in locating the records thus cited.

### Records

Because of the great variety and complexity of some archival material, there are no convenient models that would be applicable to all records. The initial citation, however, might consist of those of the following elements applicable in each instance: item, file unit or subseries, series title, originating office (and the administrative units of which that office is a part), name of collection or record group number and title, and depository. Except for placing the cited item first, there is no general agreement on the sequence of the remaining elements in the citation. Publishers, professional journals, and graduate faculties all prescribe their own style. Whatever sequence is adopted, however, should be used consistently throughout the same work. If in doubt, the researcher should confer with an archivist regarding elements that may be necessary to identify adequately specific records being cited.

### Microfilm Publications

Citation to records reproduced in National Archives microfilm publications should provide, in general, the same information as suggested above, but with sufficient additional information to identify the particular microfilm publication as well as roll and frame numbers, if applicable.

Microfilm publications of foreign records seized during World War II involve such peculiarities of identification that largely individualized suggested systems of citation have been developed for them. The following examples suggest both a form of initial citation and of subsequent citations of the same document for each of five major microfilm projects reproducing captured German and related records. The form for the bibliography, which is not illustrated below, could be some appropriate modification of the initial citation, but should also include the National Archives record group title and number, and the title and number of the microfilm publication, e.g., National Archives Collection of World War II War Crimes Records, Record Group 238, *U.S. v. Otto Ohlendorf et al*, Microfilm Publication M895, 38 rolls; National Archives Collection of Foreign Records Seized, Record Group 242, Records of the Reich Ministry of Economics, Microfilm Publication T71, 148 rolls.

The serial number is the essential identification, whether the serial is of the interchangeable unlettered or H serials, or of the B,C,F,K,L, and M serials. The terms reel, container, or roll are acceptable variations, with the last preferred by the National Archives. With the Tripartite Project microfilm, National Archives Microfilm Publication T120, it is imperative to distinguish between serial and roll numbers, and the *Catalog of Files and Microfilm of the German Foreign Ministry Archives, 1920-1945*, 4 vols., has as a supplement to each volume, a National Archives serial-roll conversion list. The Public Record Office in London uses the same serial and frame numbers, although not always the same roll numbers, and the microfilm publication symbols GFM 2-5 instead of T120, to identify the Tripartite Project microfilm. The other Whaddon Hall microfilm projects use the same number for serial and roll, as the SA (Saint Antony's College project) serial example, given above, indicates; the National Archives has substituted microfilm publication number for project symbols.
