## INTRODUCTION

### The Guide Project

The Guides to German Records Microfilmed at Alexandria, Va., constitute a series of finding aids to the National Archives and Records Administration (NARA) microfilm publications of seized records of German central, regional, and local government agencies and of military commands and units, as well as of the Nazi Party, its component formations, affiliated associations, and supervised organizations. For the most part, these records were created during the period 1920-1945.

The guide series was initiated as a microfilming project of the Committee for the Study of War Documents of the American Historical Association (AHA) in cooperation with the National Archives and the Department of the Army. With the termination of AHA participation in July 1963, the National Archives assumed sole responsibility for the reproduction of records and the preparation of guides.

Guide No. 85 is Part VIII of Records of the German Armed Forces High Command (Oberkommando der Wehrmacht--OKW) and describes records reproduced on 83 rolls of NARA Microfilm Publication T77 (rolls 1125-1207) which are part of the National Archives Collection of Seized Enemy Records 1941- , Record Group 242. Parts I-VII constitute Guides Nos. 7, 17, 18, 19, 78, 80, and 84.

Guide No. 85 describes OKW/Wehrwirtschafts- und Ruestungsamt (OKW/Wi Rue Amt--War Economy and Armament Office) records of the German occupation of western parts of the Soviet Union (including the Ukraine, Belorussia, the Crimea, and the Caucasus), Poland, and the Baltic States (Lithuania, Latvia, and Estonia) from 1941 to 1945. The records are office files which contain war journals, appendixes, directives, regulations, lists, correspondence, maps, photographs, and statistical tables from the Economic Staff East (Wirtschaftsstab Ost), from Economic Inspectorates (Wirtschaftsinspektion) North, Center, South, Don-Donets, and the Caucasus, and from economic units in various districts and cities concerned with the exploitation of the Occupied Eastern Territories.

This guide is one of a series describing the records of OKW/Wi Rue Amt and contains descriptions of records microfilmed under item numbers "Wi/ID" (Eastern Europe), from Wi/ID.552 to Wi/ID.1723. The record item numbers are not inclusive. Item numbers Wi/ID.1 to Wi/ID.551 are described in Guide No. 84.

Other records of this office, designated Wi/IF5 and largely pertinent to the German war economy, rearmament, and war production from World War I to World War II, have previously been described in Guide No. 7, Records of Headquarters, German Armed Forces High Command, Part I. Records of this office pertaining to other countries have been described in Guide No. 17, Records of Headquarters, German Armed Forces High Command, Part II, and also in Guide No. 8, Miscellaneous German Records Collection, Part II (which is a guide to Microfilm Publication T84).

### The War Economy and Armament Staff

The OKW/Wi Rue Amt originated in 1935 as a special staff (Sonderstab) named Wehrwirtschaftsstab (War Economy Staff). It was headed by Generalleutnant Georg Thomas, who reported to the Minister of War (Kriegsminister) Feldmarschall Werner von Blomberg. This special staff studied economic situations and procured equipment and arms for all three branches of OKW (army, navy and air force). The staff also was responsible for the provision of food, supplies, and quarters for the armed units. The War Economy Staff (Wehrwirtschaftsstab) was renamed the War Economy Office (Wehrwirtschaftsamt) in 1938 and became the War Economy and Armament Office (Wehrwirtschafts- und Ruestungsamt) in 1939. During the war it was subordinate to the Reichsministerium fuer Ruestung- und Kriegsproduktion (Reich Ministry for Armament and War Production).

Various reorganizations and redesignations within the Wi Rue Amt took place during the war years. These changes involved the general mission of the Wi Rue Amt and the organization of its economy and armament offices: Ruestungsinspektorat (Rue In) at the Wehrkreise (Armament Inspectorates at Recruitment and Replacement Districts of German Armed Forces); the Wirtschaftsinspektorat (Wi In) in den besetzten Ostgebieten (Economic Inspectorates in Occupied Eastern Territories); the Armeewirtschaftsfuehrer (AWi Fue) and Verbindungsoffiziere (VO) with Armeeoberkommando (AOK) and Heeresgruppen (Liaison Officers with German Army Field Commands and Axis Armies); the Wirtschaftsstab Ost with its subordinate subsections of Wi In Nord, Mitte, Sued, and Kaukasus (Economic Inspectorates North, Center, South, and Caucasus); and the Wirtschaftskommandos (Wi Kdo--Economic Commands) and Wehrmachterfassungskommando (WEK--Armed Forces Requisition Commands) assigned with German and Axis forces in the Occupied Eastern Territories. Amtsgruppe Inland (Internal Economic Section) became responsible for administrative and personnel matters, armaments, raw materials, traffic, labor, and petroleum products; Amtsgruppe Ausland (Foreign States) became responsible for foreign trade, commerce, and propaganda.

Close cooperation was required between the Wirtschaftsministerium (Economic Ministry), the "Vierjahresplan" (Four Year Plan) directed by Hermann Goering, the Reichsarbeitsministerium (Labor Ministry), and the Deutsche Arbeitsfront (German Labor Front), the Reichsbank, the Preiskommissar (Price Commissioner), the Verkehrsministerium (Transportation Ministry), the Landwirtschaft- und Ernaehrungsministerium (Agriculture and Nutrition Ministry), the Reichsforstmeister (Chief of Forestry), the Auswaertiges Amt (Foreign Office) for foreign trade, and other leading departments responsible for the German economy, armament production, allocation of foreign labor, and the economic exploitation of foreign lands and their products.

The establishment of the Feldwirtschaftsamt (Field Economy Office) took place during 1944, headed by General Otto Stapf (formerly Wi Stab Ost-- Economic Staff East), with the mission to provide supplies and war materials to the troops and to secure transport of goods and labor to Germany.

## The Records

### NATIONAL ARCHIVES COLLECTION OF SEIZED ENEMY RECORDS, 1941- , RECORD GROUP 242

The microfilm publications in this record group are listed below according to the place where the filming was done. The original paper records have been returned to the country of origin. A relatively small number of these papers may have been of private origin; the fact of their seizure is not believed to divest their original owners of any literary property rights in them. Anyone, therefore, who publishes them in whole or in part without permission may be held liable for infringement of property rights.

## **NATIONAL ARCHIVES COLLECTION OF WORLD WAR II WAR CRIMES RECORDS, RECORD GROUP 238**

In Europe, the United States conducted war crimes trials under three jurisdictions: that of the International Military Tribunal (IMT) at Nuernberg (RG 238), that of the U.S. military tribunals at Nuernberg (RG 238) and that of the U.S. Army courts (RG 153 & RG 338). The records of the trials at Nuernberg generally consist of transcripts of the proceedings, prosecution and defense exhibits, interrogation records, document books and court papers including official court files, minute books, order and judgment books and clemency petitions. In addition, the Nuernberg trial records include the prosecution document series from which most of the prosecution exhibits and some defense exhibits were drawn.

### Records of International Military Tribunal

The nearly complete transcript of proceedings of the IMT at Nuernberg and most of the documentary evidence have been published in *Trial of the Major War Criminals Before the International Military Tribunal* (Nuernberg, 1947) 42 vols. A NARA Publication PI 21 *Preliminary Inventory of the Records of the United States Counsel for the Prosecution of Axis Criminality* is also available. NARA also holds motion pictures, photographs, and sound recordings of the IMT proceedings at Nuernberg.

#### **RECORDS OF U.S. ARMY COMMANDS, 1942- , RECORD GROUP 338**

War crimes trials records for Germany also were collected or generated by the U.S. 3d and 7th Armies initially, then by special war crimes sections of the Judge Advocate General (JAG), Europe. Because these sections sent reports and other materials to Washington, some of the same material is in RG 53, Records of the Judge Advocate General (Army), and has proven to be a useful source for filling in gaps discovered in the RG 338 records. While materials from RG 53 are frequently found in the microfilmed publications listed below, the great bulk of the records filmed come from RG 338 in each case.

RG 338 also includes the "Foreign Military Studies" manuscripts prepared by former German officers for the Historical Division of the U.S. Army, Europe.

## SUGGESTIONS FOR CITING MICROFILM OF CAPTURED GERMAN AND RELATED RECORDS IN THE NATIONAL ARCHIVES OF THE UNITED STATES

The National Archives and Records Administration (NARA) is frequently asked to provide recommendations regarding information to be included in footnotes and other references to records among its holdings. The following suggestions should serve this purpose and also help our staff in locating the records thus cited.

### Records

Because of the great variety and complexity of some archival material, there are no convenient models that would be applicable to all records. The initial citation, however, might consist of those of the following elements applicable in each instance: item, file unit or subseries, series title, originating office (and the administrative units of which that office is a part), name of collection or record group number and title, and depository. Except for placing the cited item first, there is no general agreement on the sequence of the remaining elements in the citation. Publishers, professional journals, and graduate faculties all prescribe their own style. Whatever sequence is adopted, however, should be used consistently throughout the same work. If in doubt, the researcher should confer with an archivist regarding elements that may be necessary to identify adequately specific records being cited.

### Microfilm Publications

Citation to records reproduced in National Archives microfilm publications should provide, in general, the same information as suggested above, but with sufficient additional information to identify the particular microfilm publication as well as roll and frame numbers, if applicable.

Microfilm publications of foreign records seized during World War II involve such peculiarities of identification that largely individualized suggested systems of citation have been developed for them. The following examples suggest both a form of initial citation and of subsequent citations of the same document for each of five major microfilm projects reproducing captured German and related records; the form for the bibliography, which is not illustrated below, could be some appropriate modification of the initial citation, but should also include the National Archives record group title and number, and the title and number of the microfilm publication, e.g., National Archives Collection of World War II War Crimes Records (Nuernberg), Record Group 238, *U.S. v. Otto Ohlendorf, et al.*, Microfilm Publication M895, 38 rolls; National Archives Collection of Foreign Records Seized 1941- , Record Group 242, Records of the Reich Ministry of Economics, Microfilm Publication T71, 148 rolls.

Item numbers such as EAP 173-a-10/22a, or OKW 1015 are optional and serial numbers unnecessary. Frames are sometimes unnumbered.

2. Foreign Ministry Archives and records of the Reichskanzlei filmed at Whaddon Hall.

Initial citation:

Ambassador in Madrid (Stohrer) to Foreign Ministry, Berlin, Dec. 9, 1940, German Foreign Ministry Archives, Serial 136, frames D674515-516; National Archives Microfilm Publication T120, roll 146.

Subsequent citations:

Initial citation:

Subsequent citations:

SA/T136/83/19.

The serial number is the essential identification, whether the serial is of the interchangeable unlettered or H serials, or of the B,C,F,K,L, and M serials. The terms reel, container or roll are acceptable variations, with the last preferred by the National Archives. With the Tripartite Project microfilm, National Archives Microfilm Publication T120, it is imperative to distinguish between serial and roll numbers, and the *Catalog of Files and Microfilm of the German Foreign Ministry Archives, 1920-1945*, 4 vols., has as a supplement to each volume, a National Archives serial-roll conversion list. The Public Record Office in London uses the same serial and frame numbers, although not always the same roll numbers, and the microfilm publication symbols GFM 2-5 instead of T120, to identify the Tripartite Project microfilm. The other Whaddon Hall microfilm projects use the same number for serial and roll, as the SA (Saint Antony's College project) serial example, given above, indicates; the National Archives has substituted microfilm publication number for project symbols.

3. Records from the German Naval Archives microfilmed by the United States Navy (Office of Naval Intelligence--ONI) at the Admiralty, London.

Initial citation:

"Schlachtschiff 'Bismarck' nachtraeglich entzifferte englische Funksprueche," 23.5.-27.5.1941, PG 47893, T-1 83-C, National Archives Microfilm Publication T1022, roll 2791.

Subsequent citation:

"Schlachtschiff 'Bismarck'," T1022/2791/PG 47893.

Initial citation:

"Seeschlacht vor dem Skagerrak," 31.5.-1.6.1916, Az. Kr. Op. Nordsee 61, PG 64808-64813; TA-109-A, TA-110-A, TA-104-D, TA-105-D, and TA-106-D; National Archives Microfilm Publication T1022, rolls 347-348 and 443-445.

Subsequent citations:

"Seeschlacht vor dem Skagerrak," T1022/347-348, 443-445/PG 64808-64813.

PG number is the essential record item number; the National Archives T1022 roll number is sufficient microfilm identification. The "T-" and "TA-" prefixes indicate the original U.S. Navy microfilm designation (for World War I German Navy records the prefix "TA-" is used) and is included for roll verification. There are no frame numbers in this microfilm publication.

4. Heeresarchiv Potsdam records microfilmed at the National Archives.

Initial citation:

Groener to Alarich von Gleich, Papers of General Wilhelm Groener (Groener Nachlass) at the Bundesarchiv Koblenz, National Archives Microfilm Publication M137, roll 7.

Subsequent citations:

5. National Archives microfilm of Nuernberg War Crimes Trial Records.

Initial citation:

Subsequent citations:
