THE AMERICAN HISTORICAL ASSOCIATION (AHA)
COMMITTEE FOR THE STUDY OF WAR DOCUMENTS

GUIDES TO GERMAN RECORDS MICROFILMED AT ALEXANDRIA, VA.

This is part of a series of Guides prepared by the American Historical Association listing records microfilmed at Alexandria, Va., by the American Historical Association Microfilming Project.

An American Committee for the Study of War Documents was established in 1955 as a private group of scholars, interested in documentary research and especially in the microfilming of records of foreign origin kept in American depositories. In 1956, the American Committee became a committee of the American Historical Association. Its present Chairman (1959) is Professor Oron J. Hale, University of Virginia, who was preceded by Dean Reginald H. Phelps, Harvard University, and Professor Lynn M. Case of the University of Pennsylvania. An initial Ford Foundation grant and additional funds provided by the Old Dominion Foundation, Lilly Endowment and the Avalon Foundation enabled the Committee to undertake the cataloguing and microfilming of declassified German records in the custody of the World War II Records Division of the National Archives (previously TAGO, Departmental Records Branch) at Alexandria, Virginia.

The plans for screening and microfilming of these materials were prepared by a Subcommittee on Microfilming under the Chairmanship to the end of 1956 of Professor E. Malcolm Carroll, Duke University, and his successor, Dr. Fritz T. Epstein, the Library of Congress. The microfilming team at Alexandria was under the direction of Professor Gerhard L. Weinberg of the University of Michigan in 1956/57, of Dr. Dagmar Horna Perman from 1957 to September 1959, of Mr. James G. McDowell from September 1959 to August 1960, and is now under the supervision of Dr. Willard Allen Fletcher of the University of Colorado.

The American Historical Association expresses its appreciation for the cooperation given to its Committee for the Study of War Documents by the staffs of the National Archives, especially its World War II Records Division, as well as the U.S. Department of the Army.

This Guide is one of a series of finding aids describing those declassified seized German records deposited at the World War II Records Division, National Archives, that have been microfilmed by the Microfilming Project of the Committee for the Study of War Documents of the American Historical Association. The Guide contains the text of data sheets identifying records filmed. A copy of the data sheets has been filmed as a target sheet at the beginning of each roll of film.

This Guide describes 43 rolls of film of records of civil government agencies (mainly in Hesse), records of the National Socialist Party and affiliated local offices in Hesse and Baden, records of the Deutsche Arbeitsfront (DAF), records of the Reichsstudentenf \ddot{u} hrung as well as of the National Sozialistischer Studenten Bund (NSDStB) with its suboffices, records of student fraternities, and records of the Landesbischof der Evangelischen Landeskirche Hessen-Nassau. With few exceptions, the documents refer to the period of National Socialist rule.

The records in this collection constitute a valuable aid for the study of many aspects of German administrative and political history in the 1930's. NSDAP records, especially those from the Kreisleitung Marburg/Lahn, yield much information on the use of mechanisms of political control on the local level of government, on the social background of local political leadership, and on the development of National Socialist ideology. The files of the NSDStB offer an insight into the Gleichschaltung of university life after 1933, while the records of the fraternities and the Landesbischof of Hessen-Nassau contain information relative to the conservative opposition in the 1930's. The value of the records of the fraternities is enhanced by the fact that they extend back into the nineteenth century and thus reflect changes in the intellectual, political and social views of students over a prolonged period of time. Lastly, the DAF files give some indication of the social welfare policies implemented in Germany after 1933.

Documents in this collection which were not filmed consist mainly of repetitious or stray items, such as bills, duplicates, local personnel files and books or periodicals available at the Library of Congress.

The terms "Serial" and "Roll" in this Guide refer to the sequence of film. The "Item" number is the identification symbol on the original folder within the captured records collection. "Provenance" indicates, where ascertainable, the archival origin of the documents whose description follows. The symbol "FT" means that the folder has been filmed throughout; the symbol "FS" denotes that the folder has been filmed selectively. "1st frame" gives the frame number of the first page of the folder. Every exposure has been given a frame number consecutively throughout the filming operation. The "Notes" provide a general idea of the nature of the materials but should not be taken as exhaustive descriptions. Apart from a few minor rearrangements folders were filmed in numerical order. Although, on the whole, subjects tended to appear coherently and in numerical sequence, it is still necessary to check the whole Guide for any one subject.

The original records have been returned to the Federal Republic of Germany. The microfilms are deposited in the National Archives, Washington 25, D.C. as microcopy T-81, rolls 221-R263, and should be requested by adding "T-81" to the rolls desired.
